

191

Great Productivity

Large sweeping path

Extensive filtering surface

High Performance

Direct sweeping

SLS (Self Levelling System) automatic brush pressure control

Pleated micro-fine polyester filter

Effective filter shaking system

SLS System - Brush self-levelling system

Pleated micro-fine polyester filter

A long spring enables the brush to adapt immediately to all surfaces. Once adjusted, the brush remains in that position until completely worn out.

The machine is equipped with large elements separated by polyester fabric for maximum dust filtration capacity.

Sweepers

191

Ergonomics, User Friendly

Hydraulic power steering

Easy to use control panel

Designed for maximum comfort

Designed to assure minimum noise levels

Low Maintenance Costs

Closed hydraulic circuits on both traction and sweeping system

Special enlarged easy to clean radiator

Maximum engine air inlet protection

Easy to access to motor compartment

Robust Construction

Heavy duty chassis in fully coated steel

Maximum protection against impact

Debris flap in stainless steel

Extra-strong components for outdoor use

Hydroguide

Hydraulic piston connected to the rear guide wheel.

Fine dust setup

Optional side brush cover for use in very dusty areas.

Third brush setup

Third side brush accessory for sweeping in difficult to reach points or pavements.
