

Specialised Floor Cleaning Robots

# Meet the LeoBots

Specifically created to support the existing cleaning crew with manual work while enabling them to perform supervisory duties. LionsBot's range of LeoBots help to speed up the cleaning tasks while delivering greater cleaning consistency.

The family comprises of 4 different models, each is made to perform a specific function, so as to achieve maximum efficiency in its cleaning operation.

A crowd pleaser. They are able to inform, entertain and even exchange a simple conversation with you upon activation via QR code.

## Class Leading Safety Features

LionsBot has a well-planned and comprehensive approach to building safe cleaning robots.

From the physical design, to the advanced sensors and special mechanisms, they are all thoughtfully devised and incorporated to minimise any unsafe situations from arising.

## Flexible Cleaning Modes

The multiple, versatile cleaning modes cater to different facilities and situations.

The cleaning robots are able to operate by solo mode or in a team; and in manual or automatic mode.

Upon finishing their assigned duties, the smart robots self-dock, and are able to automatically recharge, refill clean water and discharge waste water.

## Teamwork

LeoBots are great team players. All of them can be linked and assigned to work together. Smart cleaning is achieved via data sharing among the robots for full scale cleaning operations, or to get the cleaning completed at a faster time.

### LeoScrub

Scrubbing expert. Uses up to 70% less water with high cleaning results.

### LeoVac

Vacuum genius. Comes with Optional HEPA filter for cleaner air.

### LeoMop

Silent mopper. Leaves behind much drier floors.

### LeoPull

Small but strong worker. Able to pull 450kg Bin.

## LionsOS

LionsOS empowered LeoBots free you from constant maintenance concerns as the cloud infrastructure allows you to:

Receive a Compiled Report

Share Real-Time Updates to Monitor Cleaning

Operate Robots Anywhere, Anytime, via LionsClean App

Provide 24x7 Cloud Service Support

Manage Robots Tracking

Manual control if needed.
